

This September we are visiting eight cities in nineteen days: The Fire and Hazard Roadshow truck will make its way back south again and travel through Turkey, introducing the latest innovations and technological developments of fire protection products.

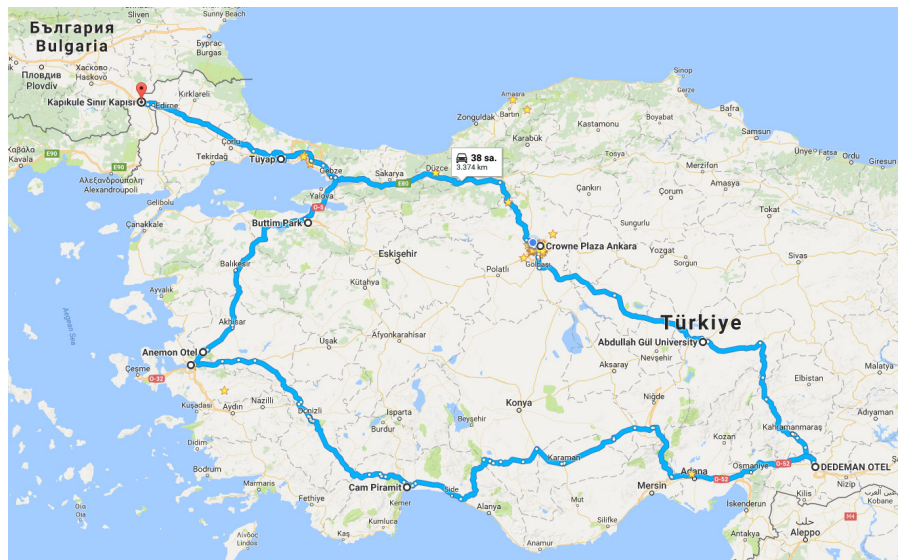

On board the truck will be the range of ZETTLER detection products, such as the PROFILE Flexible control panel and the 3oTec, our triple sensing technology detector. In addition, we will feature all our latest fire suppression technology including iFlow, the new acoustic nozzle and the environmentally friendly fire suppression systems; HYGGOOD Sapphire and water mist.

To kick off the roadshow, the truck will be stopping at ISAF Fire and Security Fair in Istanbul from the 14-17th September, where visitors will experience live demonstrations and presentations on all our latest fire protection technology.

Augmented reality experiences of gaseous and fire suppression products will offer our visitors more detailed experiences of our systems.

After the fair, the truck will host day events in Ankara, Kerseri, Gaziantep, Antalya and Izmir and finally Bursa on the 2nd of October.
