

The year 2015 has certainly been a busy one for ZETTLER and as plans for 2016 get underway we thought we would share some of the highlights from this year with you:

- January** ZETTLER PROFILE showcased at Hilton Engineering Conference, Istanbul
- February** ZETTLER Roadshow Truck toured the UK
- March** PROFILE animations released in 10 languages
- April** New Total Solutions brochure available for French market
- May** ZETTLER attended Sodex, Ankara and a VIP customer event at The Kempinski Palace Hotel in Istanbul
- June** ZETTLER attended Interschutz, Hannover, Germany
- July** ZETTLER attended Almadalen week in Sweden
- August** Second tour of the UK, and addition of Meridian and AR Feature to the truck plus a NEW Architects & Engineers section is released on our website
- September** Meridian Gas Detector launched with interface to ZETTLER PROFILE
- October** PROFILE is launched in APAC
- November & December** – The Roadshow tours France and attends Preventica Lyon.

Coming up in 2016 . . .

**Products**

ZETTLER is constantly reviewing its product range to ensure it provides its customers with smarter, safer, greener detection solutions and we are sure we'll not disappoint with our new product launches in 2016.

We will also be teaching customers about our Generation 6 detector range, with a refresher campaign that will include a video animation on the advanced technology inside the detector chamber, making these detectors reliable and resistant to false alarms.

#### **Events**

ZETTLER will be attending Eliaden in Oslo, Norway at the end of May. Eliaden is a three day exhibition, which occurs every two years and focuses on the electrical engineering sector. Thousands of industry professionals attend the event which focuses on technology in the energy sector, industrial sector and in the building sector.

ZETTLER will be showcasing its full range of fire detection technology including its PROFILE control panels and Generation 6 Detectors.

#### **Other**
