

The ZETTLER Roadshow Truck recently concluded its second European tour, clocking up an impressive 40,000km, the equivalent of a round-the-world trip.

The Roadshow Truck travelled the continent, bringing ZETTLER's state-of-the-art fire detection products to nearly 2000 customers at trade shows, exhibitions and over 112 different customer events in 48 locations.

This year the truck has travelled from Dounreay in the very north of Scotland to Istanbul in the south of Turkey, stopping at many destinations along the way. The truck has visited the UK, Spain, Switzerland, Germany, and The Netherlands, driven 7000km through Austria and Poland, toured the Czech Republic and France, and connected east to west as it drove over the Bosphorus Bridge in Istanbul, Turkey. Watch the video [here](#).

Of course the Truck wouldn't move an inch without our trusted driver, Sjaack, who has clocked up a staggering 700 hours of driving throughout 2015, that's the same as 70 continuous days. He has battled through snow storms in the Alps and floods in the Scottish Highlands, however he always gets the truck to its destination on time. We couldn't do it without him.

As well as featuring ZETTLER's [PROFILE panels](#), [Generation 6 detectors](#) and [Flame Vision](#) products the truck saw some new additions in 2015, the Scott Safety [Universal Meridian Gas detector](#) and our customer-focused augmented reality. The ZETTLER Augmented Reality feature shows ZETTLER products installed in a real life environment through a virtual 360° tour of specific environments.

The Meridian Gas Detector can interface directly with MZX and ZETTLER PROFILE fire detection and alarm systems using the DDM800 Fire and Gas Module, to provide an economical combined fire and gas solution.

Next year the ZETTLER Roadshow will return visiting even more cities, with amazing product demonstrations planned including Augmented Reality experiences of gaseous and fire suppression products – giving you an overview of complete Tyco solutions.
