ZETTLER Truck Roadshow arrives in Poland and the Czech Republic

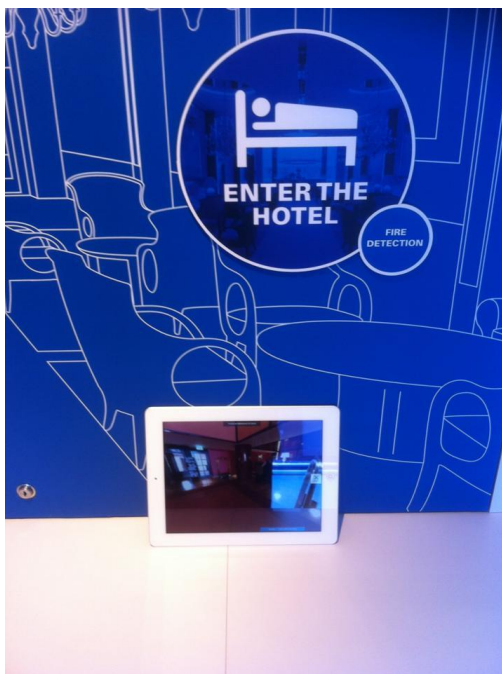

Tyco Fire Protection Products has announced the latest ZETTLER roadshows in Poland and the Czech Republic presenting the whole ZETTLER range of fire detection products.

Between the 21 – 25 September, the ZETTLER Roadshow Truck will tour through Poland in partnership with key ZETTLER distributor, [Lanster](#), before travelling to the Czech Republic. The truck brings the latest innovations in fire detection directly to consultants and fire engineers, system integrators, installers, end users and fire services.

The ZETTLER truck visits Poland at an exciting time, as the ZETTLER PROFILE series has recently received Polish approvals. ZETTLER incorporates a range of state-of-the-art fire detection control panels built on Tyco's proven MZX Technology. MZX technology offers high resilience and reduces the risk of false alarms, making it the ideal solution for a wide range of commercial, retail and public building applications.

PROFILE offers an enhanced installation, configuration and service set-up saving valuable time and cost, and features new innovations such as login via an RFID tag which replaces the conventional key switch. PROFILE combines powerful detection and alarm capability with a new touchscreen technology to provide an easy-to-operate and ergonomically engineered user interface via an 8.4" TFT colour screen.

As well as featuring the latest PROFILE technology, the roadshow will feature live product demonstrations and visitors will get to experience the new ZETTLER [Augmented Reality](#) feature, which shows ZETTLER products installed in a real life environment through a virtual 360° tour of a hotel.

Commenting on the tour, Krzysztof Klasa (Account Manager, Poland) said "It is very exciting to have the truck in Poland. By bringing our combination of knowledge, expertise and advanced products on the road, we can reach our customers in their local markets and help them overcome their project challenges."

The truck will arrive in Poland on the 21st September and will visit Krakow, Wroclaw, Poznan and Warsaw. It will then travel to the Czech Republic where it will be hosting a VIP day at the Tyco manufacturing facility in Rajeccko and visiting the Tomas Bata University.
